

Quality Indicators for Generative Artificial Intelligence (AI) in Education

"Quality Indicators for Generative Artificial Intelligence (AI) in Education"

- Inspired by Quality Indicators for Assistive Technology (<https://qiat.org/indicators/>)
- Created by Bruce Alter, PT, AT Consultant and Gayl Bowser, M.S.Ed. (one of QIAT's founders)
- Currently being piloted in a handful of Oregon school districts

Use to self-assess school/district progress on genAI, gaps to address

- <https://bit.ly/QualAI>
- Make a duplicate of this document before using

If you decide to use this, please do the following:

- Track your progress
- Answer the questions below
- Send this and other feedback to Bruce Alter at: alterb@mac.com

Questions

1. Does your agency have policies and guidance about the use of AI with students?
2. Does your agency have policies and procedures regarding staff use of AI for testing, content development, etc.?
3. Which of the quality indicator areas/indicators do you feel are a priority for integration into your agency's guidance and oversight?
4. How might you use the Quality Indicators for AI in your agency? At what level would you find them useful?
5. What are your thoughts about the need to develop and distribute quality indicators for AI that can guide staff and student use of AI?
